## Unique design - dual-purpose AUTOSCRUB wash mitt

**\$46.15**  
each

### NEW AUTOSCRUB™ Clay Wash Mitt

It's 2 exterior car cleaning tools in one!!! The **Presta AUTOSCRUB™ Wash Mitt** combines two unique surfaces to speed vehicle surface cleaning. First, choose either a **Medium Wash Mitt (#8130714 Yellow)** for light colored cars or a **Fine Wash Mitt (#8130715 Blue)** for dark colored cars. Then, use the soft, scratch-free microfiber side as a wash mitt with Sudzz Car Wash (#1355) to remove dirt and debris.

Directions: Use only on clean and cool surfaces. Mix one ounce of Sudzz Car Wash (#1355) per gallon of water. Rinse surface with water to flush away loose dirt. Wash and rinse in sections using **AUTOSCRUB™ Wash Mitt** using light pressure. Begin from the bottom, and work the suds up to the hood, trunk and sides. Rinse with clean water and dry vehicle.

Next, use the unique polymer coating side with Spray 'N Shine (#1309) as a lubricant to quickly remove surface contaminants such as water spots, tree sap, rail dust and overspray from automotive paint, glass, moldings and plastics for a clean, film-free surface. This polymer coating lasts 4 times longer than traditional clay bars and can be easily rinsed clean.

- Soft, scratch-free micro-fiber surface works great with Sudzz Car Wash (#1355)
- Unique polymer coating on reverse side removes surface contaminants such as water spots, tree sap and more with Spray 'N Shine (#1309)
- Lasts up to 4 times longer and works 3 times faster than clay bars
- If dropped on the floor, simply rinse clean

6" x 8.7"

**Medium Wash Mitt (#8130714 Yellow)**

**Fine Wash Mitt (#8130715 Blue)**
