

PRODUCT BULLETIN

DATE: 2/7/2019

CONTACT: Markus Kleis

ITEM #: M2611

ITEM: Hi-Tech Yellow Wax

SUMMARY: The supplier who has historically produced the unique yellow cap that goes over the M2611 Yellow Wax tin to hold the applicator pad has closed its doors and the factory. We were unsuccessful in finding a replacement source to produce this piece, so we will be removing the topper and applicator.

WHAT'S NEW/CHANGING?

M2611 will no longer have the transparent yellow plastic topper containing the basic foam applicator pad. Shipper dimensions are identical to M5014, with the same 6 eaches per shipper as before for M2611. Some previous communication suggested a switch from a 6 pack to a 12 pack for the shipper, which was incorrect. We were able to maintain the current count of 6.
