

Specialty Fillers

Check out our new fiber reinforced fillers inside...

No matter the repair challenge... EVERCOAT[®] offers the right Specialty Product!

50 Years of Automotive Innovation!

Specialty Fillers

PRODUCT	PRODUCT No.	Units/ Case.	DESCRIPTION
FIBER TECH™ 1.79 lb Squeeze tube	633	6	FIBER TECH™ Reinforced Repair Compound / Filler is an all purpose repair compound formulated with Kevlar® and other high tech fibers. Its superior strength and adhesion is ideal for repairing SMC, Rigid plastic body panels, i.e. ground effects, spoilers, running boards, fenders, hoods, etc. Also containing ZNX-7™, FIBER TECH™ is zinc compatible for superior adhesion to steel, galvanized steel and aluminum. FIBER TECH™ replaces resin, cloth and mat. Blue cream hardener included.
EVERGLASS® Gallon Quart	622 632	4 6	Excellent for repairing holes, rusted metal, body seams and shattered fiberglass, EVERGLASS® is reinforced with both Kevlar® and short strand fiber for extra strength! EVERGLASS® provides the ultimate in prevention of repair mapping. High build and water proof, EVERGLASS® contains ZNX-7™ which makes it zinc compatible for superior adhesion and corrosion resistance to bare steel, galvanized steel and aluminum. Blue cream hardener included.
GLASS-LITE™ Gallon Quart	639 638	4 6	GLASS-LITE™ is the first lightweight , short strand fiber reinforced body filler to hit the market! This unique reinforced filler offers all of the benefits of typical short strand filler, while providing superior sanding and spreading capabilities. GLASS-LITE™ sands to a finishable, primer ready quality, eliminating the need to apply conventional lightweight filler. Can be used for a variety of repairs including rust repair, weld areas, bond lines and shattered fiberglass. Blue cream hardener included.
KITTY HAIR® Gallon Quart	869 868	4 6	Best known for their bridging capabilities in rebuilding shattered fiberglass and reinforcing torn or rusted areas of sheet metal, KITTY HAIR® and TIGER HAIR® are formulated with long strands of chopped fiberglass that doubles the strength compared to standard fillers. Waterproof and rustproof. Should be finished with RAGE® and/or METAL GLAZE®. Blue cream hardener included.
TIGER HAIR® Gallon Quart	1190 1189	4 6	
VETTE PANEL ADHESIVE/ FILLER™ Gallon Quart	880 870	4 6	Polyester body filler primarily used as a filler on SMC and fiberglass panels. When used in conjunction with FIBER TECH™ or EVERGLASS®, provides optimal performance of the repair system, reducing cracking, repair mapping and bond line swelling. Can also be used as a light duty-bonding adhesive for non-structural repairs such as backing repair strips and old style fiberglass panels. This non-shrink polyester body filler helps prevent repair mapping on seam lines over fiberglass. Blue cream hardener included.
METAL-2-METAL™ Quart .75 oz. Extra Reactor	889 8887	6 24	Best known as "The nearest thing to lead", METEL-2-METAL™ is an aluminum body repair filler that offers excellent corrosion resistance and superior adhesion to galvanized steel and aluminum. METAL-2-METAL™ is moisture-proof, rustproof and sag resistant, and easily sands to a fine featheredge. METAL-2-METAL™ liquid reactor is included.

Specialty Fillers

Some of Many Uses for Specialty Fillers

To reinforce high stress areas where objects will be mounted such as mirrors and door handles.

Classic car restorations and re-building for additional strength, durability and longevity.

Panel bonds and weld seams that require additional strength due to potential cracking and repair mapping.

Structural composite repairs, gap filling and panel bridging.

Rust repair and filling large holes in metal, wood and fiberglass.

FIBER TECH™ Multi-Fiber Reinforced Repair Compound / Filler

NEW!

USES

- Rigid composite repairs including rigid plastic, SMC, and fiberglass.
- Gap filling/panel bridging.
- Aluminum, steel, galvanized steel.
- Running boards, ground effects, spoilers, SMC composite fenders, hoods, lift gates, pickup boxes...

FEATURES

- Premium resin system and fiber combination is ideal for double-sided repairs, eliminating the need for most fiberglass resin and mat applications.
- Contains Kevlar® and high-tech short and long strand fibers for superior strength, providing the strength of long strand filler.
- Zinc compatible with ZNX-7™ for improved corrosion protection, adhesion, waterproof and rustproof.

ADVANTAGES

- Provides the density and stability of a short strand filler to prevent repair mapping.
- Offers the utility of a long strand filler and the ease of use of a short strand filler.
- Specially formulated to hold down bond lines, seams and repair mapping on SMC, fiberglass and other thermal sensitive substrates.

EVERGLASS® Short Strand Reinforced Filler

USES

- Non-structural composite repairs and filling
- Excellent for panel bond seams, weld areas, impact vulnerable areas (door edges, door handle areas), filling over SMC and fiberglass (rigid composite repairs) and areas prone to excessive water exposure (rocker panels, lower body panels).

FEATURES

- Now with Kevlar® for additional strength and durability!
- Zinc compatible with ZNX-7™ for improved corrosion protection, adhesion, waterproof and rustproof.

ADVANTAGES

- Provides the best protection against repair mapping.
- Provides superior strength vs. the leading competitor.

GLASS-LITE™ Light Weight / Short Strand Reinforced Filler

NEW!

USES

- All purpose reinforced lightweight filler.
- Nonstructural composite repairs and filing.
- Ideal for rust repair and filling holes in metal, wood and fiberglass. Use for panel bond seams, weld areas, filling over SMC and fiberglass (rigid composite repairs).
- Cosmetic body filler applications.

FEATURES

- Light weight for easy sanding!
- Easy spreading for extremely smooth surface profile!
- ZNX-7™ patented technology for superior adhesion and featheredging on steel, galvanized steel and aluminum.
- Rustproof and waterproof.

ADVANTAGES

- Fastest and easiest sanding light weight reinforced filler... saves time and money!

VETTE PANEL ADHESIVE/FILLER™

USES

- When used in conjunction with Fiber Tech™, provides optimal performance of the repair system, reducing cracking, repair mapping and bond line swelling.
- Special heavy weight body filler designed for SMC, fiberglass, and rigid composites.
- Can be used on steel.

FEATURES

- Specially designed to mimic the same degree of expansion and contraction of SMC, reducing cracking in high stress areas.
- Sands at the same rate as SMC, reducing undercutting of SMC edges and insuring excellent featheredging capabilities.
- Resists shrinkage.
- Sands to a primer-ready, finishable quality.

ADVANTAGES

- Unsurpassed performance in a plastic repair system, especially when used in conjunction with Fiber Tech™ Reinforced Repair Compound/Filler.

KITTY HAIR® Long Strand Fiberglass Reinforced Filler

TIGER HAIR® Long Strand Fiberglass Reinforced Filler

USES

- Heavy duty repairs.
- High stress repairs.
- SMC, fiberglass, steel.
- Excellent for bulk filling – rust repairs, large holes in metal, wood and fiberglass.

FEATURES

- Unique polyester resin blend with heavy duty long strand bulk fibers.
- Provides maximum impact and crack resistance in bulk filling applications and when bridging over shattered and heavily damaged fiberglass and metal repairs.
- Offers many alternative applications such as rotted wood, plaster and stucco repair, and filling cracks in concrete and masonry.

ADVANTAGES

- Uses a unique blend of polyester resin for maximum strength and consistent performance!

METAL-2-METAL™ Aluminum Reinforced Filler

USES

- Excellent for high stress areas and areas where objects will be mounted.
- Resists "compression" when drilling and mounting objects.
- Seam-to-seam welded repairs.
- Conductive applications.

FEATURES

- "Closest thing to metal."
- True aluminum filler.
- Will not sag.
- Easily sands to fine featheredge.
- 100% Stain Free.

ADVANTAGES

- High-strength resin and pure aluminum insures optimum strength and impact resistance vs. the leading competitor!
