# TWIST-ON AND TWIST-OFF WITH SPEED-LOK!

## Norton SG Blaze® Discs

Norton SG Blaze self-sharpening design is ideal for high pressure, heavy metal removal applications. The engineered, laminated backing is extremely durable for the most rugged applications.

## BlueFire® Discs

Heavy duty grinding discs are preferred by body shop professionals for tough jobs like paint removal, cutting down plastic filler or prepping bare metal. The unique grain composition promotes a quick initial cut and actually self-sharpen with continued use.

## Bear-Tex® Surface Blending Discs

Bear-Tex surface blending discs deliver superior, consistent finishes whenever you need to clean, deburr, blend or finish. Ideal for removing rust and oxides, blending out disc marks, and removing coatings and gasket residues. Product color coding (by grit) makes work fast and easy.

## Blaze® Rapid Strip™ Discs

Excellent for removal of rust, undercoating, seam-sealers and stone guards, these discs can get into hard-to-reach areas like wheel wells and under carriage. Ideal for trunk beds and door jambs. Use to remove oxidation from tire rims and to remove rust from brake assemblies.

## Speed-Lok® TR Back-Up Pads

Twist-on and twist-off fast for maximum efficiency and productivity. No tools required, just a flick of the wrist is all that's needed to change discs

### FEATURES

- Laminated backing
- Seeded gel (SG) abrasive

### BENEFITS

- Incredibly durable
- Long life and cool cut

GRIT	2" TR	3" TR	CASE
UPC	662611-	662611-	
80	62324	62334	25
60	62322	62332	25
50	62320	62330	25
36	62318	62328	25

### FEATURES

- Superior zirconia alumina grain
- Durable phenolic resin bond system

### BENEFITS

- Promotes quick initial cut
- Actually self-sharpen with continued use
- Optimizes grain adhesion
- Extends product life
