### DESCRIPTION:

**Strata Ultra Cutting Crème Light** is a mildly abrasive compound designed to remove 2000 grit or finer sand scratches from any paint surface – from soft, freshly painted to fully cured. **Ultra Cutting Crème Light** produces a high-gloss finish without the use of waxes, silicones or fillers that hide scratches and defects.

### DIRECTIONS:

Shake product well before using. Apply a 1" (25mm) dab of **Ultra Cutting Crème Light** to a 2'x2' (.6m x .6m) area and spread with the cutting pad. Gradually increase buffer speed to 1500 – 1800 rpm. Buff until all of the compound is gone and a glossy finish has been created. If the product dries too quickly, mist with Spray 'N Shine (#130922) or a little water. Wipe surface with a Presta Micro Fiber Cloth. Repeat if necessary.

### FEATURES & BENEFITS:

- Removes light sand scratches from fresh and cured paint
- Produces a high gloss shine
- Contains no fillers, waxes or silicones
- Works well on medium solid clears and soft, baked paint
- Minimizes swirls

### RECOMMENDED PAD:

To remove 2000 grit sand scratches, use a **yellow blended wool** buffing pad.

As the first step in removing cured swirls, use a **blue blended wool** pad.

### PACKAGE SIZES:

Quarts	Part # 133432
Gallons	Part # 133401
